Code can be run with

1. g++ -std=c++11 main.cpp
2. ./a.out x y
   where,
   x -> 0 for Problem 1
      -> 1 for Problem 2
   y -> 0 without MRV heuristic
      -> 1 with MRV heuristic

   eg: ./a.out 0 0
      This will run the code for problem 1 without MRV Heuristic.
